

Audio Production

Audio for Web & Marketing

We offer voice-over services that are ideal for podcasting, advertising, online learning modules and corporate films. Perhaps you would like to add an embedded audio file into your web page, or add sound to an advertising project. Recording facilities are available from our Studio or we can come to you with our portable digital recorders or mini-studio. Multi-lingual voiceover is also available for Portuguese, German, French, Hindi, Punjabi, Urdu and Arabic. We also offer an audio mixing service if you have existing audio you would like enhanced.

Audio Podcast

In the busy world we live in it is getting harder for business to ensure its messages are heard. Modern consumers, especially the young, have become adept at filtering out advertising, making traditional methods less and less effective. The advantage of a podcast is that it can be listened to whenever the user likes. We can help you develop an engaging and regular communication, combining it with your corporate blogs or customer communication strategy.
